\_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

<p>Document 1: JP, 2000-302981, A (Kaneka Corp.), 31 October, 2000 (31.10.00), Patent claim, [0044], [0049], [0062], [Working example] column</p> <p>Claims 1, 2, 5, 6</p> <p>The invention of claims 1, 2 does not appear to involve an inventive step in view of document 1 cited in the ISR. The ingredients (a) – (c) described in the patent claims of document 1 respectively correspond to the ingredients (A) – (C) in the invention of the present application. The patent claims of document 1 describe the idea that polyether-based polymers of a predetermined molecular weight scope terminated by an alkenyl group can be used as ingredient (a), and [0062] describes also the use as an adhesive agent. Further, [0066] describes the same compound as the compound (B) expressed in the predetermined structural formula described in claim 2 of the present application.</p> <p>Claim 3</p> <p>The invention of claim 3 does not appear to involve an inventive step in view of the above document 1. In paragraph [0044], document 1 describes the idea that substances having multiple silicon atoms bonded to hydrogen as shown in the general formula 12, etc., can be used as ingredient (b). Performing a certain degree of optimization for the number of hydrosilyl groups or the number average molecular weight of the said ingredient (b) is within the scope of what a person skilled in the art normally does, and this does also not produce a significant effect that cannot be anticipated.</p> <p>Claim 4</p> <p>The invention of claim 4 does not appear to involve an inventive step in view of the above document 1. In paragraph [0049], document 1 suggests the desirable scope of the molar ratio of the alkenyl group and the hydrosilyl group.</p>

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 2

Claim 2 contains the text "average structural formula", but it is not clear what concretely the "average" is pertaining to. (Does this mean that m and n are identified by the "average" number?)
